MONTCLAIR, Oakland,

Impressive architecturally modern home located in the Oakland Hills near Montclair Village has several noteworthy features reflecting thoughtful architectural design. Thick concrete walls create passive temperature regulation throughout the year. The window placement facilitates natural ventilation allowing heat to dissipate quickly during warmer months. This combined with strategically placed skylights and "grated landings," allows abundant natural light despite having portions of the home built into the hillside. The home includes redundant systems (two furnaces, air conditioning systems, and water heaters), three gas fireplaces, and an outdoor grill connected directly to the natural gas line for convenience. To further its uniqueness, the property includes a koi pond that supports goldfish that have been thriving for years, creating a self-sustaining ecosystem requiring minimal maintenance. The location provides easy walking access to Montclair Village is via the Montclair Railroad Trail. Access to grocery stores, banks, and other necessary amenities and social activities such as the local farmer market are just minutes away. 5 local regional parks provide walking and biking trails with many having spectacular Bay Views. All this and so much much more.

Built in 1991
