Montecito (MNCTO), Irvine,

The moment you walk inside this spacious 2414 square foot stunning Woodbury home, you are embraced by a feeling of peaceful calm. The open concept downstairs is bathed in natural light with high ceilings and abundant windows and rich wood flooring. The large living room, dining room, kitchen and covered outdoor patio flow seamlessly together to create an inviting environment for gathering with family and friends. Ample kitchen cabinets, granite countertops, countertop seating and stainless appliances will please even the most discerning home chef. Located downstairs is an office or optional fourth bedroom. Completing the ground floor are the laundry room, powder room, and direct access to the garage. Upstairs features upgraded neutral color carpet, a spacious primary bedroom with walk-in closet and luxurious en-suite bathroom, and two additional large bedrooms and full bathroom. The downstairs theme of high ceilings and large windows with plantation shutters creates a cohesive design aesthetic throughout the home. The home includes a solar energy system installed in 2023, which generates enough power for net zero energy savings and potential additional savings and is grandfathered under NEM 2.0, which provides the homeowner with greater financial benefit than a new system installed now. The garage features an epoxy garage floor, storage rack, tankless water heater and water softener.
